

1U PLUS | S25

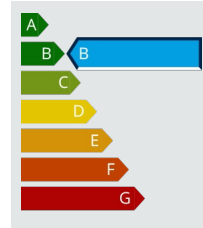

Designed to support slightly larger Micro-ATX motherboards, this case offers a superior configuration with two dedicated PCIe sockets. Unlike bifurcating a single x16 into two x8 slots, this setup ensures full performance for graphics cards that require x16 lanes. At the same time, it provides an additional PCIe slot for a video input or RAID card—offering flexibility and performance all in one. With its deeper build compared to standard 1U cases, this model accommodates more hot-swappable bays, additional PCIe cards, and up to four DIMMs thanks to the larger mATX boards. This means enhanced storage, expanded customization options, and increased RAM capacity for superior performance. As with all our products, we prioritize your needs. Whether you're looking for custom branding or bespoke metalwork design modifications, our team is here to help you achieve the perfect solution.
